Gene:

ABHD5

Strong Feature Importance signal for ABHD5 is typically observed around

[chr3:43190000-44190499](#)

(click to jump; zoom out to kb scale if needed)

Cell types:

Astrocytes:Alzheimer's

Feature Importance type:

SHAP

Epigenetic Signal type:

ATAC

Back to previous gene

☐ Show Ensembl regulatory build track

TF source for FIMO:

- ☐ Use latest saved PASTAA TFs
- ☒ Type TF / motif IDs manually

Manual TF names:

JUN

Enter up to 20 TF names separated by commas, spaces, or new lines. The app will match them to available JASPAR motifs automatically. FIMO uses the ENCODE candidate enhancer background.

☒ Replace previous FIMO tracks

Run FIMO / show binding sites in IGV

Status:

FIMO tracks added: 1 track(s)
Gene: ABHD5
Selected TFs from PASTAA/manual input: JUN
Tracks with FIMO hits: JUN
ENCODE background sites: 9
TFs without track / reason: none
